

Sponsorship Opportunities

GBI envisions a world where sustainable, healthy, and resilient buildings are available for all. That's why we're committed to making Green Globes® certification accessible to any building owner or project team dedicated to improving the design and/or operations of their building. Green Globes can be used as a guide to create resource efficient and healthy buildings and as a certification system to recognize exceptional projects and promote community engagement. Everyone deserves to occupy sustainable and healthy buildings.

Through GBI's Activate Community Collaboration to Elevate Sustainable Solutions (ACCESS) Program, complimentary Green Globes certification and the support of a Green Globes Professional (GPP) are awarded annually to projects that are creating positive impacts for their local community.

Past Recipients

The Beehive by SoLa Impact - 2023
