

POSITION TITLE: **Manager, Client Services & Engagement**

Organization:

The Green Building Initiative (GBI) is a 501c3 not-for-profit organization whose mission is to accelerate the adoption of building practices that result in resource-efficient, healthier and environmentally sustainable buildings. We advance this mission through credible and practical green building approaches for more sustainable communities.

Our strategy for accomplishing our goals involves education and promotion on the use of GBI's Green Globes® building rating system for private commercial buildings and GBI's Guiding Principle Compliance® third-party assessment program for federal building sustainability requirements.

How we do it:

Our initiatives promote the use of GBI's Green Globes® building rating system for private commercial buildings and GBI's Guiding Principles Compliance® third-party assessment program for achieving federal building sustainability requirements.

This third-party certification lowers risks for owners and ensures that both buildings and the teams who build and operate them are better able to achieve desired performance outcomes.

We measure our impact in achieving our mission in several ways, including growing the number of building owners that achieve certification of individual buildings, building projects, and portfolios of buildings.
