

# GBI'S GREEN GLOBES<sup>®</sup> FOR HIGHER EDUCATION

*Empowerment through Education & Collaboration*

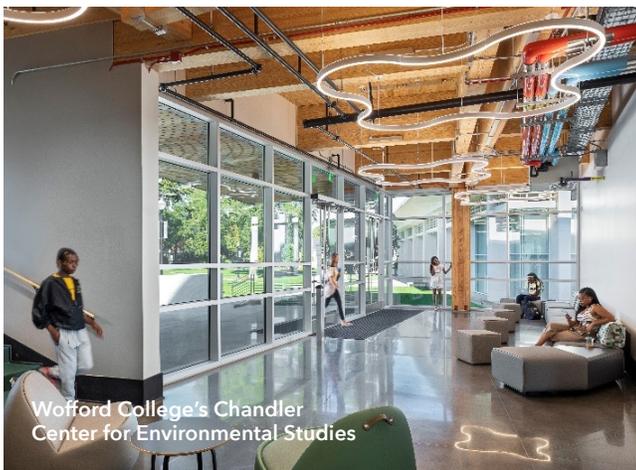

**GBI's Green Globes building certification empowers higher education institutions to advance campus sustainability, health, wellness, and resilience through a collaborative and educational approach.**

With a rigorous yet flexible framework, Green Globes adapts to the unique needs of each campus, enabling personalized solutions for

achieving sustainable outcomes. Healthier buildings foster productive learning environments, supporting both student success and institutional goals.

Additionally, the Green Globes Emerging Professional (GGEP) program offers quality education that nurtures a diverse, equitable, and inclusive workforce, equipping learners at all levels to become leaders in sustainability and green building practices.

## Who We're Working With

Wofford College's Chandler  
Center for Environmental Studies

"The fact that we had a direct connection to the assessor is unique to Green Globes. [The assessor] made the process smooth - we just had to do the work. And when we told Wofford College we were going to get Three Green Globes, they were ecstatic."

CHARLES KNEISLEY  
Assistant Project  
Manager, Robins & Morton Construction

**13 Million ft<sup>2</sup>** of higher education projects certified or in progress of certification.

## Why Certify Your Buildings with Green Globes?

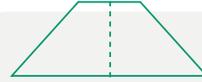

**stars**  
a program of aashe

Recognized by STARS, a program of The Association for the Advancement of Sustainability in Higher Education (AASHE)

**A preliminary assessment** provides real-time feedback to make design improvements.

**Multiple pathway options** for credit to ensure alignment with the unique needs of higher education institutions.

**Volume discounts,** portfolio level reporting, and questionnaire cloning features.

## Building Types Supported

Academic buildings | Residential Halls, Dormitories, Apartments | Recreational Facilities, Sports Complexes, and Student Unions | Research and Technology Centers | Fine Arts and Performing Arts Centers | Support Facilities

## Student Benefits

GBI works with higher education professors and faculty to provide educational content from the Green Globes Emerging Professional (GGEP) course to incorporate into curriculum. This course gives professionals early in their career the opportunity to familiarize themselves with Green Globes.

- 1 Received industry recognized credentials
- 2 Connect with peers and mentors
- 3 Earn credit from American Institute of Architects (AIA) and the Alberta Association of Architects (AAA)

"Students are learning about the design elements evaluated within Green Globes, which improve the overall sustainability, health & wellness, and resilience of all types of buildings. Green Globes principles like energy and water efficiency, and life cycle analysis can be applied in their architectural and design careers for years to come."

- Rich Mitchell, AIA, GGA, GGF, NCARB,  
Adjunct Faculty, Architecture Programs at  
NewSchool of Architecture & Design
